

# HOW TO CHANGE THE FUNCTIONAL DESIGN OF YOUR «WING» ?

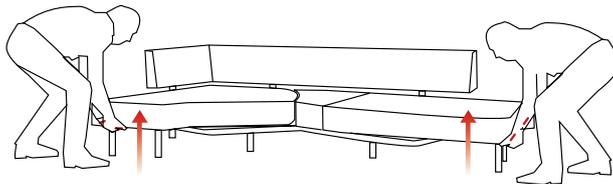

Tilt this way

ALWAYS PROCEED IN THIS ORDER  
(for any part you wish to reposition)

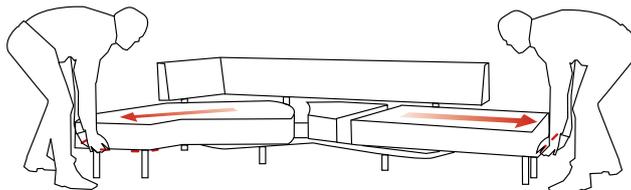

1

Put your hands on the **provided blocks** and lift the moving part slightly.

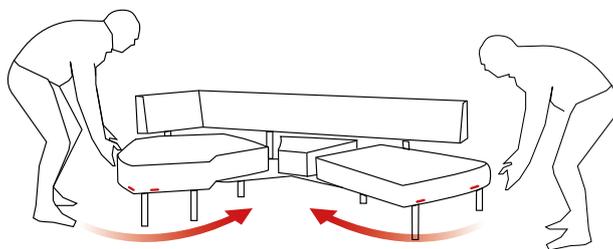

2

Then pull the moving part diagonally towards you.

3

Now slide the raised part of the wing, until you hear a **CLICK**. When you hear the click, the wing is fixed in the desired position.

1

Put your hands on the **provided plates** and lift the moving part slightly.

2

Then pull the moving part straight towards you.

3

Now slide the raised part of the wing, until you hear a **CLICK**. When you hear the click, the wing is fixed in the desired position.

To convert the wing back in open position (CORNER SOFA), carry out the movements in reversed order.
